## ABOUT CORTELLIS COMPANY DETAILED PIPELINE REPORT

Thomson Reuters provides the knowledge, tools, and expertise to help support drug discovery and development activities, IP portfolio optimization, identification of licensing and partnering opportunities, delivery of successful regulatory submissions, and the ability to keep current with the rapidly-changing pharmaceutical and chemical markets, supporting informed, early decisions.

This report was created by Thomson Reuters, using information from *Thomson Reuters Cortellis™ for Competitive Intelligence*; a comprehensive, proven intelligence solution that leverages the most accurate, complete, and widely respected drug pipeline information. From drug discovery and development activities to patent reports, the latest deals, and partnering opportunities, *Cortellis* can provide the confidence to make the most informed business decisions, faster. *Cortellis for Competitive Intelligence* provides accurate and validated information on pharmaceutical and biotechnology companies globally, their drug pipelines, deals, patents, and clinical trials, plus breaking industry news and conference coverage. All contained in one simple, highly intuitive research platform.

*Cortellis* Company Detailed Pipeline reports are the second in a series of that track pharmaceutical and biotechnology companies worldwide. All *Cortellis for Competitive Intelligence* content is subject to the most comprehensive editorial review process available, conducted by scientists, pharma professionals, regulatory experts, and generics specialists. Featuring timely drug pipeline information expertly uncovered and integrated from over 400 global meetings each year, you'll always be on top of the latest developments.

Chosen by leading life sciences companies, their executives and investors, *Cortellis for Competitive Intelligence* accelerates your deal-making and gives you timely insights on the development landscape.

**Discover undiscovered opportunities in drug development and licensing faster with *Thomson Reuters Cortellis™ for Competitive Intelligence***

## GLOSSARY

### Number of Drugs in Active Development

Number of drugs associated with the company or subsidiary that are currently in active development, i.e. the development status for the drug(s) is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

### Number of Inactive Drugs

Number of drugs associated with the company or subsidiary that are currently classified as inactive, i.e. where the development status for the drug(s) is one of the following: No Development Reported, Discontinued, or Withdrawn.

### Number of Patents as Owner

Number of patents associated with the company where the company is listed as owner; i.e. the relationship type (or way the patent refers to the company) is: Patent Assignee/Owner, Patent owner (not assignee), Licensee for development and marketing, Licensee – marketing only (Distributor), Patent assignee of family member, Inferred assignee.

### Number of Patents as Third Party

Number of patents associated with the company where the company is listed as third party; i.e. the relationship type (or way the patent refers to the company) is: Patent assignee (not owner), Ex-Licensee for development and marketing, Ex-Licensee marketing only (Distributor), Customer of technology, Ex-Customer of technology, Patent opponent or infringer, Affiliate organization of inventor, Owner of underlying technology.

### Patents summary table

This table represents a summary of the core patent coverage for this company covering Therapeutic EP, US and WO patents since 1990 only.

### Number of Deals

A count of deals where the company or one of its subsidiaries is the primary company.

### Key Indications

Displays top ten key indications for the company and its subsidiaries based on frequency (indications occurring with high and identical frequency are always included, and this may result in more than ten Key Indications being listed). Includes both indications associated with patents where the company is patent owner and indications associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

### Key Target-based Actions

Displays top ten key target-based actions for the company and its subsidiaries based on frequency (actions occurring with high and identical frequency are always included, and this may result in more than ten Key Target-based Actions being listed). Includes both target-based actions associated with patents where the company patent owner and target-based actions associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended. A target-based action is one that is associated with a target.

### Key Technologies

Displays top ten key technologies for the company and its subsidiaries based on frequency (technologies occurring with high and identical frequency are always included, and this may result in more than ten Key Technologies being listed). Includes both key technologies associated with patents where the company relationship is patent owner and key technologies associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

<b>Number of Patents as Owner</b>	6
<b>Number of Patents as Third Party</b>	0
<b>Number of Deals</b>	1
<b>Key Indications</b>	Exophthalmos, Obesity, Thyroid associated ophthalmopathy, Anesthesia
<b>Key Target-based Actions</b>	Beta adrenoceptor agonist, Beta 2 adrenoceptor agonist, Glucocorticoid agonist, Histamine receptor antagonist
<b>Key Technologies</b>	Drug combination, Steroid, Ophthalmic formulation, Parenteral formulation unspecified, Small molecule therapeutic, Injectable formulation, Subcutaneous formulation, Formulation preservation, Freeze drying

## COMPANY PROFILE

### SUMMARY

Neothetics Inc (formerly Lithera Inc) is focused on the development of products to improve patients' aesthetics and their quality-of-life.

### FINANCIAL

By December 2014, the company had completed private equity series C and D rounds to raise approximately \$14 million.

In November 2014, the company announced its initial public offering of 4,650,000 shares of its common stock at a public offering price of \$14.00 per share and also granted a 30-day option to the underwriters to purchase up to an additional 697,500 shares of common stock at the same price to cover over-allotments. At that time, the shares were scheduled to begin trading on the NASDAQ Global Market on November 20, 2014 under the ticker symbol "NEOT" and the offering was expected to close on November 25, 2014, subject to customary closing conditions. In December 2014, the offering was closed and the company planned to raise net proceeds of approximately \$60.5 million from the offering.

In December 2012, Lithera raised \$20.6 million in preferred stock equity financing. At that time, additional investments were expected to bring the total raised up to \$35.6 million. In July 2013, Lithera completed a second closing of the series C preferred stock equity financing, and secured an additional \$6.7 million, bringing the total capital raised to \$27.3 million. In February 2014, Lithera completed the final closing of the series C preferred stock equity financing, securing an additional \$8 million, bringing the total capital raised to \$35.6 million.

<b>Last Change Date</b>	11-Nov-2014

#### salmeterol xinafoate + fluticasone propionate (injectable, exophthalmos), Neothetics/NovaMedica DEVELOPMENT PROFILE

##### SUMMARY

Neothetics (formerly Lithera) is developing LIPO-102, an injectable combination of salmeterol xinafoate (SX) and fluticasone propionate (FP), which reduces local fat deposits by stimulating fat metabolism, for the potential intraorbital treatment of thyroid-related exophthalmos,. In March 2010, a phase II trial was initiated in Australia and New Zealand. In November 2010, a phase II trial in US was completed and results were reported. In June 2013, development was ongoing. In November 2014, the program was listed on the company's pipeline. In December 2012, Russian partner NovaMedica was planning to commercialize Lithera's products in Russia and CIS countries.
