ABOUT COMPANY AND PIPELINE OVERVIEW REPORT

Thomson Reuters provides the knowledge, tools, and expertise to help support drug discovery and development activities, IP portfolio optimization, identification of licensing and partnering opportunities, delivery of successful regulatory submissions, and the ability to keep current with the rapidly-changing pharmaceutical and chemical markets, supporting informed, early decisions.

This report was created by Thomson Reuters, using information from *Thomson Reuters Cortellis™ for Competitive Intelligence*; a comprehensive, proven intelligence solution that leverages the most accurate, complete, and widely respected drug pipeline information. From drug discovery and development activities to patent reports, the latest deals, and partnering opportunities, *Cortellis* can provide the confidence to make the most informed business decisions, faster. *Cortellis for Competitive Intelligence* provides accurate and validated information on pharmaceutical and biotechnology companies globally, their drug pipelines, deals, patents, and clinical trials, plus breaking industry news and conference coverage. All contained in one simple, highly intuitive research platform.

Cortellis Company and Pipeline Overview reports are the first in a series of reports that track pharmaceutical and biotechnology companies worldwide. Further report offerings planned to follow include: Company Detailed Pipeline and Company Competitive Landscape reports. All *Cortellis for Competitive Intelligence* content is subject to the most comprehensive editorial review process available, conducted by scientists, pharma professionals, regulatory experts, and generics specialists. Featuring timely drug pipeline information expertly uncovered and integrated from a significant number of global meetings each year, you'll always be on top of the latest developments.

Chosen by leading life sciences companies, their executives and investors, *Cortellis for Competitive Intelligence* accelerates your deal-making and gives you timely insights on the development landscape.

Discover undiscovered opportunities in drug development and licensing faster with *Thomson Reuters Cortellis™ for Competitive Intelligence*

DISCLAIMER

The information contained in this report is based on sources believed to be correct but Thomson Reuters does not guarantee the accuracy, timeliness, or completeness of this information. Opinions, if any, are those held by the author of any individual report or article at the time of initial publication and do not necessarily reflect the views of Thomson Reuters.

Information in this report on companies is intended for reference use only, and does not constitute a recommendation to buy or sell any particular security or other investment and does not constitute an offer to buy from or sell to any particular investor. Any company or securities mentioned in this report may not be suitable for any particular investor, depending on that investor's financial position and needs.

GLOSSARY

Number of Drugs in Active Development

Number of drugs associated with the company or subsidiary that are currently in active development, i.e. the development status for the drug(s) is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Number of Inactive Drugs

Number of drugs associated with the company or subsidiary that are currently classified as inactive, i.e. where the development status for the drug(s) is one of the following: No Development Reported, Discontinued, or Withdrawn.

Number of Patents as Owner

Number of patents associated with the company where the company is listed as owner; i.e. the relationship type (or way the patent refers to the company) is: Patent Assignee/Owner, Patent owner (not assignee), Licensee for development and marketing, Licensee – marketing only (Distributor), Patent assignee of family member, Inferred assignee.

Number of Patents as Third Party

Number of patents associated with the company where the company is listed as third party; i.e. the relationship type (or way the patent refers to the company) is: Patent assignee (not owner), Ex-Licensee for development and marketing, Ex-Licensee marketing only (Distributor), Customer of technology, Ex-Customer of technology, Patent opponent or infringer, Affiliate organization of inventor, Owner of underlying technology.

Patents summary table

This table represents a summary of the core patent coverage for this company covering Therapeutic EP, US and WO patents since 1990 only.

Number of Deals

A count of deals where the company or one of its subsidiaries is the primary company.

Key Indications

Displays top ten key indications for the company and its subsidiaries based on frequency (indications occurring with high and identical frequency are always included, and this may result in more than ten Key Indications being listed). Includes both indications associated with patents where the company is patent owner and indications associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Key Target-based Actions

Displays top ten key target-based actions for the company and its subsidiaries based on frequency (actions occurring with high and identical frequency are always included, and this may result in more than ten Key Target-based Actions being listed). Includes both target-based actions associated with patents where the company patent owner and target-based actions associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended. A target-based action is one that is associated with a target.

Key Technologies

Displays top ten key technologies for the company and its subsidiaries based on frequency (technologies occurring with high and identical frequency are always included, and this may result in more than ten Key Technologies being listed). Includes both key technologies associated with patents where the company relationship is patent owner and key technologies associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

PLEASE NOTE: the financials section where present in the report includes: Share Information, Stock Performance chart (including the consensus recommendation), and Major Shareholders. Financial Performance presents graphical and tabular data on Worldwide Sales, Operating Income and Net Income over time, together with a Quarterly earnings update. Balance Sheet lists Assets, Liabilities and Stockholders Equity, and Forecasts includes: EPS Forecast and Other Forecasts. The data reported in all sections (except share information and major stock holders) are correct as of the publication date of the report (and not the download date). For share information and major stock holders the data is correct for the date shown with these sections

GlycoMimetics Inc

COMPANY OVERVIEW

Company Name	GlycoMimetics Inc
Parent Company Name	GlycoMimetics Inc
Website	http://www.glycomimetics.com/
Country	US
Number of Drugs in Active Development	4
Number of Inactive Drugs	3
Number of Patents as Owner	23
Number of Patents as Third Party	0
Number of Deals	6
Key Indications	Inflammatory disease,Cancer,Acute myelogenous leukemia,Hematological neoplasm,Thromboembolism,Cardiovascular disease,Deep vein thrombosis,Metastasis,Pancreas tumor,Sickle cell crisis
Key Target-based Actions	E-Selectin antagonist,Cell adhesion molecule inhibitor,P-Selectin antagonist,CXCR4 chemokine antagonist,Dendritic ICAM-3 grabbing nonintegrin 1 inhibitor,L-Selectin antagonist,Selectin antagonist,Selectin
Key Technologies	Small molecule therapeutic,Intravenous formulation,Oral formulation,Biological therapeutic,Infusion,Nasal systemic formulation,Peptidomimetic

COMPANY PROFILE

SUMMARY

GlycoMimetics Inc (GMI) is active in the field of glycobiology and develops small-molecule drugs that mimic the functions of certain carbohydrates. The company's initial focus is on therapeutics to treat inflammatory diseases and cancer.

ACQUISITIONS AND SPIN-OFFS

By early 2003, GMI had acquired the assets of GlycoTech Corp, including exclusive rights to 15 issued US patents and numerous small molecules that could have therapeutic potential.

FINANCIAL

In October 2013, GlycoMimetics filed a registration statement on Form S-1 with the US SEC for a proposed initial public offering of shares of its common stock. By that time, the company had applied to list its common stock on the NASDAQ Global Market under the ticker symbol 'GLYC'. In January 2014, the company priced the offering of 7,000,000 common stock shares at \$8.00 per share and granted a 30-day option to the underwriters to purchase up to an additional 1,050,000 common stock shares. At that time, the offering was expected to close on January 15, 2014; later that month, the offering of 8,050,000 shares was closed. The company raised net proceeds of approximately \$57.4 million.

In October 2009, GlycoMimetics raised \$38 million from a venture financing round.

In June 2006, GlycoMimetics raised an additional \$15.4 million from its series B financing. It planned to use the funds for preclinical development of its selectin inhibitors for inflammation and its lectin-binding glycomimetics for infection.

In August 2004, GlycoMimetics raised an additional \$5.1 million from an extension to a series A seed financing, bringing total proceeds to \$9.6 million. The funds would be used to advance the company's research programs.

In May 2003, GMI closed on its initial seed round of venture financing.

PRODUCT PORTFOLIO DRUGS

PLEASE NOTE: Highest status refers to highest development of that drug for one of the active companies

rivipansel sodium

Drug Name	rivipansel sodium
Key Synonyms	rivipansel sodium, rivipansel
Originator Company	GlycoMimetics Inc
Active Companies	GlycoMimetics Inc, Pfizer Inc
Inactive Companies	
Highest Status	Phase 2 Clinical
Active Indications	Sickle cell crisis
Target-based Actions	P-Selectin antagonist, L-Selectin antagonist, E-Selectin antagonist, Cell adhesion molecule inhibitor
Other Actions	Anticancer, Chemoprotectant, Anti-inflammatory, Platelet aggregation inhibitor
Technologies	Intravenous formulation, Infusion, Small molecule therapeutic
Last Change Date	18-Jul-2014

GMI-1271

Drug Name	GMI-1271
Key Synonyms	
Originator Company	GlycoMimetics Inc
Active Companies	GlycoMimetics Inc
Inactive Companies	
Highest Status	Phase 1 Clinical
Active Indications	Deep vein thrombosis, Thromboembolism, Pancreas tumor, Metastasis, Acute myelogenous leukemia
Target-based Actions	E-Selectin antagonist
Other Actions	Anti-inflammatory, Anticancer
Technologies	Oral formulation, Intravenous formulation, Small molecule therapeutic
Last Change Date	20-Jun-2014

[Return to Table of Contents](#)

dual E-selectin and CXCR4 inhibitors (hematological cancer/inflammation), GlycoMimetics

Drug Name	dual E-selectin and CXCR4 inhibitors (hematological cancer/inflammation), GlycoMimetics
Key Synonyms	
Originator Company	GlycoMimetics Inc
Active Companies	GlycoMimetics Inc
Inactive Companies	
Highest Status	Discovery
Active Indications	Hematological neoplasm, Inflammatory disease
Target-based Actions	CXCR4 chemokine antagonist, E-Selectin antagonist, Cell adhesion molecule inhibitor
Other Actions	Anticancer chemosensitizer, Anti-inflammatory
Technologies	Small molecule therapeutic
Last Change Date	22-Jan-2014

E-selectin inhibitors (oral, inflammatory disease/cardiovascular disease/cancer), GlycoMimetics

Drug Name	E-selectin inhibitors (oral, inflammatory disease/cardiovascular disease/cancer), GlycoMimetics
Key Synonyms	
Originator Company	GlycoMimetics Inc
Active Companies	GlycoMimetics Inc
Inactive Companies	
Highest Status	Discovery
Active Indications	Cancer, Cardiovascular disease, Inflammatory disease
Target-based Actions	E-Selectin antagonist
Other Actions	Anti-inflammatory, Anticancer, Cardiovascular agent
Technologies	Oral formulation, Small molecule therapeutic
Last Change Date	21-Jan-2014
